

# Now even more flow.

Vertical sealless design eliminates bearings and conventional pump seals, resulting in a trouble free pump that can run dry continuously without damage. Proven technology that works.

Wide range of applications; including metal finishing and printed circuit board process filtration and recirculation pumps - conveyorised wet processing, fume scrubbers and effluent treatment. Longer shafted sump pumps are also available to over 3m long, with intermediate bearings.

**OEM pump RetroFit is our speciality.**

■ **Chemical Resistant**  
PVC, CPVC, Polypropylene and PVDF.

■ **In Tank Sump Pump or Out of Tank**

If there is insufficient space inside the tank, remote mounting is commonly utilised.

■ **Continuous Sump Pump Duty**

Automatic level control, with a suction extension fitted the solution level will be pumped down to the end, then reprime when the liquid level rises back up to the impeller level again.

■ **High Performance**

More than twice as much flow as previous models. Size range from  $\varnothing 4$  up to new 3" size, with flow rates up to 72m<sup>3</sup>/h and 42m (60psi) Head.

■ **High Efficiency Motors**

With corrosion resistant high gloss epoxy paint finish. Oversized bearings for arduous duties.
